- START-UP -

<p>1 Move Robo 40 to the location.</p> <ul style="list-style-type: none"> Long side Wall to right, ca. 30cm Min. 5m before first corner 		<p>6 Sensor Test</p> <p>Push shield back with both hands. Sensor test stops flashing.</p>	
<p>2 Attach vacuum nozzle</p>		<p>7 Select water Quantity</p> <ul style="list-style-type: none"> L = ca. 300m² N = ca. 600m² H = ca. 1200m² 	
<p>3 Release "Emergency stop" push-button</p>	 <p style="text-align: center; font-size: small;">Not-Aus</p>	<p>8 Select Program</p> <ul style="list-style-type: none"> Hall progra Spiral program Corridor program 	
<p>4 Turn 0/I switch to "I"</p>		<p>9 If the "RUN" button is constantly lit, the Robo 40 is ready to start.</p>	
<p>5 Press the "on/off" push-button.</p> <p>"Sensor Test" and "RUN" buttons flash</p>		<p>10 To start the cleaning program, press "Run"</p>	

- FILLING THE FRESH WATER TANK -

Fill the membrane tank (A) approx. half-way with fresh water. Add the cleaning agent* (B) and then fill the membrane tank completely to approx. 2cm below the rim. Put the lid on** (C).

*We recommend only using the original cleaning agent from the manufacturer. Unsuitable cleaning agents can lead to the water lines becoming clogged, or to other damage.

**Before closing, make sure that the water filter is at the lowest point of the tank and that the lid is resting tightly on the housing.

- CLEANING – AND MAINTENANCE CARE INSTRUCTIONS -

- ☞ Drain water
- ☞ Rinse the tank with clean water

- ☞ Place the Robo on the Service trolley

- ☞ in case of large amounts of dirt remove the cylindrical brush
- ☞ clean the brush and frame with clean water
- ☞ clean the brush strip

- ☞ remove and clean the suction nozzle
- ☞ Check the suction tube for dirt and cloggings
- ☞ Check the rubber blades of the suction nozzle that they are clean and not damaged

- ☞ Connect the Robo 40 to the charger for loading
